The system must commit five years of such revenues to the project.

Educational facilities must be more than 35 years old to be consolidated. Once a local school system has received a capital outlay grant and its need is met as determined by the department, it is not eligible to receive another grant for a period of 10 years. The State Board of Education is required to establish rules and regulations to implement the provisions of this bill.

The support will only be paid to the dependent adult child, or their guardian advocate, guardian, or agent under power of attorney, although a court is provided the discretion to assign the support to a special needs trust, as provided for by federal law. If the public is afforded the opportunity for comment during the environmental phase of a public-private partnership, the requirement that the department hold a public hearing is also waived.

HB 516 provides an exception to final approval of the projects by the board when it has previously approved the proposal based on a determination that it provided the apparent best value to the state.

The bill allows for placement of wayfinding kiosks on the public right of way. The kiosks may have a maximum height of 10 feet and a maximum width of four feet, and must be permitted. The legislation provides for removal of any kiosk deemed in violation of law, and thus a safety hazard or public nuisance. HB 516 establishes the term "commercial motor vehicle restricted highway", which means a portion of highway designated by the GDOT as a scenic highway that spans more than one county and has fixed gates installed by the GDOT to prohibit entrance and operation of motor vehicles on such highway during hazardous weather conditions. The bill prohibits operation of a motor vehicle with more than six wheels on a commercial motor vehicle restricted highway.

The legislation removes the population factor in O.C.G.A. 40-6-12 related to maximum speed limits. Highways that are part of the federal interstate system and highways physically divided with full control of access, and that are part of the state highway system have a maximum speed limit of 70 miles per hour. Highways physically divided without full control of access that are part of the state highway system have a maximum speed limit of 65 miles per hour.

The legislation removes the requirement for allocation by formula of the locomotive diesel tax and allows for use of the funds to pay for administrative costs consistent with the Georgia Freight Railroad Program. The allocation must take into consideration the total track miles operated within the state by a common carrier, and any other factors deemed appropriate by the commissioner.

HB 516 extends the effective date of SB 146 (2023 Session) relative to the regulatory authority of the Department of Agriculture, and the taxation of electricity used as motor fuel and electric vehicle charging stations to January 1, 2026.

Final Bill Summary: HB 581 amends O.C.G.A. 48-5-2, relating to ad valorem taxation, to add a definition for "estimated roll-back rate" to mean the current year's estimated millage rate minus the millage equivalent of the total net assessed value added by reassessments. Language is also struck that required using the most recent arm's length transaction amount in any year as the maximum allowable fair market value for the next taxable year.

The bill sets additional requirements for the ad valorem tax bill that is prepared annually by the county tax commissioner or collector to include the total amount of taxes levied on property owned by the taxpayer, the amount or property tax granted by Act of the 1973 Session of Georgia's General Assembly, and net amount of taxes due for the current year.

HB 581 amends O.C.G.A. 48-8-6, relating to limitations on local sales and use taxes, by eliminating the current limit of two percent on local sales tax, as well as exceptions that allow local government entities to go beyond the limit.

The bill provides for local sales tax to be levied up to two percent, with the following exceptions: an additional one percent each for an education-related special purpose local option sales tax, a transportation-related sales and use tax of up to one percent, and sales and use taxes allowed under Article 4 of Chapter 8 of Title 48, relating to the municipal option sales tax.

The bill creates a new local option sales tax to be titled a "flexible penny local option sales tax", or FLOST. Following an intergovernmental agreement and voter approval via a referendum, a one percent sales tax can be collected for the purpose of providing property tax relief, provided that all participating counties or municipalities have adopted an adjusted value homestead exemption.

The bill requires the commissioner of the Department of Revenue to not certify the tax digest of a political subdivision that is not in compliance with specified uses of taxes levied in this Code section.

### **SB 195 "Freedom to Work Act"; enact**

***By: Sen. Larry Walker III (20th) Through the Regulated Industries Committee***

Final Bill Summary: Section 1 and 2 of SB 195 enter Georgia into the 'Social Work Licensure Compact'.

The Georgia Composite Board of Professional Counselors, Social Workers, and Marriage and Family Therapists will be the administrators of this compact while rulemaking is overseen by the Social Work Licensure Compact Commission, made up of members of all existing member states. The purposes of the compact include increasing public access to social workers, reducing the multiple licenses required between different member states, and promoting mobility between member states to lessen the current workforce shortage for social workers.

All member states must also meet criteria to be eligible for the compact, including certain graduation requirements, licensure of one of three license categories, and a completed period of supervision for participating social workers. A multistate license is available under this compact for social workers who meet the applicable requirements. The requirements take into account education, background, and other regulatory measures usually required in attaining a standard social worker license. The criteria will also include any differing requirements the participating states may require. A social worker must comply with all laws and regulations of the host state in which the services are being provided.

Any active military member or their spouse can designate any member state to be their "home state", and retain their designation during the period that the service member is on active duty. The compact will have the state join a data system maintained by the commission, that will have member data including identifying information, licensure data, and other non-confidential information.

If a state is deemed by the commission to be in default or non-compliance of the compact, the commission is responsible for sending them a written notice detailing the default. After all courses of action have been exhausted, the defaulting state may be terminated from the compact by a majority vote of the commission.

The executive and judicial branches of each participating state will be responsible for enforcing the compact. Withdrawal from the compact requires a statute repealing the compact, and will not take effect until 180 days after the enactment of that statute. The compact will become effective after a seventh member state joins the compact.

Section 3 removes the requirement that an applicant has moved from another state to apply for a license by endorsement.

Section 4 modifies the requirements for a soil classifier license.

Section 5 removes a reference to O.C.G.A. 43-15-2, relating to surveyor intern certificates.

Section 6 repeals a section related to surveyor intern certificates.

Section 7 provides for requirements for a person to be licensed as a professional land surveyor, which can be completed in three different ways. This section also provides requirements for those applying for a land surveyor intern certificate.
